It's February, and Valentine's Day is coming. Inspired by the teacher's presentation of the song of the day, Evan begins to write love songs, first about grandma and later about Megan Moriarty, on which he is in love. Meanwhile, Jessie is working on an additional credit project, a class newspaper. She hopes to find out not only who brings secret banned money to the class, but also who shakes into someone else's class and how her classmates think sympathy should be revealed. As in other books in the series, Jessie doesn't understand the basic social points, while Evan loses patience with his sister when it violates his privacy. So far, Jacqueline Davies has taught readers about economics, law and maps. The Candy Smash focuses on journalism and poetry. Each chapter is opened by defining a term related either to newspapers or to creative writing, and through Jessie and Evan's experiences, the reader learns the appropriate use of those terms. The educational aspect of the story is certainly subtle and does not overcome the plot, but there are many excellent opportunities for class teachers to associate this book with their curricula. It's a largely characterful story that provides a lot of insight into the personalities of both Jessie and Evan. It seems that only Evan's character is really evolving; With each new book, I wonder when Jessie's going to start to mature a little. It is true that she is a year younger than her classmates, but there should still be some changes in her world view and relationships that I have never really seen before. Davies perfectly portrays Jessie's innocence and lack of experience. Less likely as she ages. I was also surprised by how little their grandmother appears in this story. After the events Bendita Zvon moved in with Treskis, but we don't see much of her, even though her presence in Evan's poetic mind is much sniffed. Also important is Jessie and Evan the teacher who is brought in by their students and dedicated to helping them improve as many students as possible. I like how she uses her cat Langston as a class mascot and shows pictures of him around her classroom. I'd put her in the same category as Clementine's wonderful teacher, Mr. D'Matza. My favorite thing about this book, in general, is how well it handles a romantic topic. Many books for younger middle-class readers introduce dating into the lives of fourth-class characters as if it's a perfectly natural thing for nine-year-olds to join in pairs. In my experience with children, they are not interested in dating at this young age, and this book reflects the reality much more closely than many others of this same reading level and genre. Of course, the characters have sympathy, but they are still figuring out what it means and how it will affect their friendships. I particularly like the way Evan's love for Megan is resolved - sweet but without the tone of adult commitment and high school drama. Candy Smash doesn't really stand alone, so I recommend starting with Lemonade War and reading books in order. Parents should feel comfortable giving this series to their second-graders and third-graders, who are strong readers, and I think even fifth-graders can still enjoy the stories. Inflated journalists and poets will like the last part, which depicts a class newspaper and some of the poems that students have written.
